The JRMF Webinar Series is an effort to bring the experience of our Mathematics Festivals to the homes and classrooms of curious children and adults. We intend the webinars to be interactive and fun, a place where participants can share the joy of mathematics among like-minded individuals. In order to promote an atmosphere that is conducive to learning, we respectfully request that you adhere to the Rules of Engagement below.

1. Explore the activity ahead of time. You do not need to have answers to every question. In fact, your reason to join this webinar is to explore aspects that are unclear to you after such initial exploration.
2. Be respectful when addressing others.
3. Be patient with other people’s learning pace, especially those younger or less experienced than you.
4. Provide everyone with the space to share their ideas, even if you don’t agree with them.
5. Treat your and others' mistakes as opportunities to learn, not reasons to criticize or judge.
6. Keep your microphone off until it is your turn to speak.
7. Use the chat box to ask questions. We will be monitoring them.
8. At times we may ask you to share your screen with the audience. Please, make sure there is nothing inappropriate on your screen, including browser tabs or windows.
9. Share feedback when you receive a post-webinar questionnaire.
